Discipline Supports and Resources:

Just as school discipline is proactive, remote learning discipline is proactive as well. The best way to address student behavior is through proactive connection and communication with both students and parents. Make intentional time to make connections, set expectations and procedures just as you would in the classroom, and provide instruction around unwanted behavior when necessary.

The Restorative Practices Team, in partnership with the Offices of Student Engagement and Student Discipline, has created the Restorative Responses Toolkit, a series of resources to support our school-based educators in addressing specific student behaviors with a restorative lens. Due to our circumstances of remote learning, the RP team has also developed Responsive Restorative Responses for Remote Learning for further considerations.

Discipline Reminders:

Please continue to refer to the [Jeffco Discipline Matrix](#) to guide your decisions.

- We are encouraging administrators and teachers to use restorative responses to discipline instead of removing a student's access to technology. In situations where there is a serious behavior issue, please consider the recommendations from Ed Tech and IT below.
- If it is necessary to remove a student's access to technology for a day or longer, please use the current suspension practices, as removing their access would be a suspension.
- The maximum number of days you can remove access to education is 5 days.

Apps for coping skills and support:

Daylio

<https://daylio.webflow.io/>

Daylio enables you to keep a private journal without having to type a single line. Pick your mood and add activities you have been doing during the day. You can also add notes and keep an old school diary. Daylio is collecting recorded moods and activities in the statistics and calendar. This format will help you to understand your habits better. Keep track of your activities and create patterns to become more productive!

Fear Tools

<https://www.feartools.com/>

[FearTools](#) is an evidence-based app designed to help you combat anxiety, aiding you on your road to recovery. This application is especially useful for those suffering from Generalized Anxiety Disorder, Phobias, and Social Anxiety Disorder

MoodTools

<https://www.moodtools.org/>

[Mood Tools](#) aims to support people with clinical depression by aiding the path to recovery. Discover helpful videos that can improve your mood and behavior, log and analyze your thoughts using Cognitive Behavioral Therapy (CBT) principles, develop a suicide safety plan and more.

Mind Shift

<https://www.anxietycanada.com/resources/mindshift-cbt/>

is one of the best mental health apps designed specifically for teens and young adults with anxiety. Rather than trying to avoid anxious feelings, [Mind Shift](#) stresses the importance of changing how you think about anxiety. Think of this app as the cheerleader in your pocket, encouraging you to take charge of your life, ride out intense emotions, and face challenging situations.

- Self-Help for Anxiety Management (SAM)

<https://www.psyberguide.org/apps/self-help-for-anxiety-management/>

[SAM](#) might be perfect for you if you're interested in self-help, but meditation isn't your thing. Users are prompted to build their own 24-hour anxiety toolkit that allows you to track anxious thoughts and behavior over time, and learn 25 different self-help techniques. You can also use SAM's "Social Cloud" feature to confidentially connect with other users in an online community for additional support.

- **Sleepio**

<https://www.sleepio.com/>

[Sleepio](#) is a six week sleep improvement program. It has been designed by sleep expert Prof Colin Espie and features the latest Cognitive and Behavioral Therapy (CBT) techniques.

- **Calm**

<https://www.calm.com/>

[Calm](#) promises that you'll "sleep more, stress less, and live better." How? Through guided meditation, relaxing music and sounds for sleep, videos on mindful movement and stretching, mindfulness classes, and images of nature.

- **Insight Timer**

<https://apps.apple.com/us/app/insight-timer-meditation-app/id337472899>

- [Insight Timer](#) is a large, app-based library of guided meditations. The free version includes 30,000 free meditations, including a group specifically made to aid your sleep.

- **Headspace**

<https://apps.apple.com/us/app/headspace-meditation-sleep/id493145008/?platform=ipad>

Many therapists recommend meditation for stress relief, and [Headspace](#) can help you learn how to do it with lighthearted (and very cute) cartoons guiding each meditation.

- **CBT Thought Record Diary**

<https://careclinic.io/cbt-tracker/>

The centerpiece of cognitive-behavioral therapy is changing your emotions by identifying negative and distorted thinking patterns. You can use [CBT Thought Record Diary](#) to document negative emotions, analyze flaws in your thinking, and reevaluate your thoughts. This is a great app for gradually changing your approach to anxiety-inducing situations and your thinking patterns for future situations.

- DistrACT

<https://apps.apple.com/us/app/distract/id1225176329>

If you're having suicidal thoughts or thoughts of self-harm, [distrACT](#) works to give you quick, accurate information about these thoughts and how to get through them. The app was created by doctors who have expertise in self-harm and suicide prevention.

- Happify

<https://apps.apple.com/us/app/happify-for-stress-worry/id730601963>

Here's another for those out there who want games to relieve their stress. [Happify](#) claims to have science-backed games to reduce stress and help you live a happier life.

- **Stop, Breathe, and Think**

<https://www.stopbreathethink.com/>

Check-in with your emotions to receive daily meditation and mindfulness recommendations tuned to how you feel. This calming meditation app experience is uniquely designed to help you stay mindful, de-stress, sleep better, and build the emotional strength and confidence to handle life's ups and downs. Mindfulness & meditation is the practice, [Stop, Breathe & Think](#) is the process.

- What's Up

<https://www.psyberguide.org/apps/whats-up/>

[What's up](#) is an amazing free app that uses Cognitive Behavioral Therapy (CBT) and Acceptance Commitment Therapy (ACT) methods to help you cope with Depression, Anxiety, Stress, and more. Use the positive and negative habit tracker to maintain your good habits, and break those that are counterproductive. We particularly love the "Get

Grounded” page, which contains over 100 different questions to pinpoint what you’re feeling, and the “Thinking Patterns” page, which teaches you how to stop negative internal monologues. Try it out for yourself.
